Emergency Medicine Shapiro Students 2020

Please join us in welcoming our newest DEM Shapiro Students - Jaime Brown, Derek Steck, Ian Wolf, and Simon Yadgir! Each student has been paired with one of our faculty members and has been assigned an innovative research project. Research projects span a broad range of scientific investigation, from COVID19 research to antibiotic prescribing practices in rural Guatemala. The Shapiro Summer Research Program culminates in poster presentations at SMPH's annual Research Day.

Jaime Brown
Faculty Mentor: Jessica Schmidt, MD, MPH
Project Title: "Assessment of antibiotic self-medication practices in rural Guatemala after new changes mandating prescription for antibiotics"

Derek Steck
Faculty Mentor: Marin Darsie, MD
Project Title: "No CPR vs. DNR – Do They Mean The Same Thing To UW Health Employees And Our Patients?"
*NEW* Clin-STAR Grant Opportunity

A major goal of the Clin-STAR Transdisciplinary Clinical Aging Research Pilot Grants is to bridge junior and senior researchers from different disciplines and institutions in order to stimulate new areas of clinical aging research. The awards will be made to junior clinician-scientists who work collaboratively with an investigator from a different discipline. The Clin-STAR Coordinating Center has set aside $160,000 to fund at least 3 projects.

July 2, 2020 - 11:00am-1:00pm

**4th of July - Independence Day 🇺🇸**
July 4, 2020
As a part of the AHRQ grant titled “Engineering Safe Care Journeys for Vulnerable Older Adults”, EDRCs will start administering surveys to older adult fall patients about their perceptions of health care. EDRCs will administer two short surveys, one in the middle of the patient's stay and one just before the patient leaves the ED. These data will serve as baseline data to evaluate a tool that will be designed to improve transitions from the ED to the hospital, the patient's home, and skilled nursing facilities. If you have any questions or concerns about the project, please contact the study PI, Dr. Pascale Carayon (pcarayon@wisc.edu) or Drs. Shah or Patterson.

The majority of our study enrollment is still paused due to the ongoing COVID-19 pandemic. As of July 1st, SMPH has started Phase 2 of the Research Reboot initiative to expand on-site research activities while minimizing the risk of transmission of COVID-19. Our study enrollment will restart slowly as approvals are being reviewed. We are working closely with study teams and clinical leadership to ensure the safety of our staff and providers, as well as for our patients and the community.
